

AIRPAX

THE GALLEY AND LAVATORY COMBO – A SPACE MIRACLE

DIEHL
Aviation

**Climbing higher.
Together**

CHARACTERISTICS

50 kg less weight! 12 additional seats! Easily accessible lavatories in a narrow-body aircraft! All of this and much more has been made possible by Diehl Aviation. It even has a name: AirPax. Developed for the needs of crew and passengers. By intelligently using of the space in the bulkhead, AirPax combines half a galley (8 half-size trolleys, up to 20 service units) with 2 lavatories. In flight, they can very easily be turned into one large, PRM space. AirPax weighs significantly less than competitor products and is less complex. It is also less expensive, easier to maintain and operate. Diehl Aviation: Simple. Robust. Efficient. AirPax.

BENEFITS

- > 60 kg less weight than competitor and standard solutions
- Up to 12 more seats
- Attractive total costs
- Robust and durable
- PRM functionality
